A dynamic and innovative support facility specializing in the repair & overhaul of aircraft fuel components. The Fuel Cell was acquired, relocated and expanded by Frank Villasante in 2017.

### **Homepage - The Fuel Cell**

Fly-by-wire (FBW) is a system that replaces the conventional manual flight controls of an aircraft with an electronic interface. The movements of flight controls are converted to electronic signals transmitted by wires (hence the fly-by-wire term), and flight control computers determine how to move the actuators at each control surface to provide the ordered response.

### **Fly-by-wire - Wikipedia**

The aircraft design process is the engineering design process by which aircraft are designed. These depend on many factors such as customer and manufacturer demand, safety protocols, physical

and economic constraints etc. For some types of aircraft the design process is regulated by national airworthiness authorities.
