\* the AXR has better emissions (despite worse economy) so will save you a few quid on road tax \* the AXR has the same "stutter" as the BLT \* not a fair comparison, but driven back to back my 200K+ miles ATD ran rings around the new and still-tight AXR for drivability. Miles later, I don't think the AXR has ever got to the level of the ATD.

Anyone know the AXR Crossbone?. Deos anyone have any experience of or knowledge of either the AXR Crossbone (www.axrdistribution.com)or the luxury (!) Carbone version? I seem to remember reading a test review in one of the UK papers on the Crossbone which slated it for having scarcely any suspension and being pointless but I can't find the report online.

2007 Octavia 1.9L can be either VE or PD, you need to look which engine you have. VE requires 505.00 (or higher) PD requires 505.01 (or higher). The manual most likely reflects requirements for all the engines available. The AQM, AGR, ALH, AHF, and ASV engines are VE. The ATD, ASZ, and AXR engines are PD. Hope that helps. \_\_\_\_\_
