Which remote works with which Nikon? Most new Nikon cameras don't come with a remote control. Some camera bodies will work with multiple remotes (wired and wireless), but unlike the legendary Nikon interchangeable lenses, the remotes don't switch between camera bodies so easily. Here's a quick guide on which remotes work with which cameras and what's the best Nikon remote for your camera.

The Nikon D3S is a 12.1-megapixel professional-grade full frame digital single-lens reflex camera announced by Nikon Corporation on 14 October 2009. The D3S is the fourth camera in Nikon's line to feature a full-frame sensor, following the D3, D700 and D3X. It is also Nikon's first full-frame camera to feature HD (720p/30) video recording.

The Nikon D3X is a 24.4-megapixel professional-grade full-frame digital single-lens reflex camera announced by the Nikon Corporation on 1 December 2008. The D3X is the third camera in Nikon's line to offer a full-frame sensor, following the D3 and D700. As Nikon's new flagship model, it augments the Nikon D3S, Nikon's high-speed professional model, and while the D3S retains advantages in terms ...

The surprise in Nikon's 2012 FX onslaught was the D600, announced just prior to Photokina and only about six months after the D4/D800/D800E. The FX line went from one model (D3) to two (D3 and D700), to three (D3, D3x, and D700), and now with the current configuration, we're technically at six variants (D3x, D4, Df, D610, D800, and D800E).

The Nikon D90 is a fantastic camera. It's Nikon's newest and best DX format DSLR. I prefer it to the old D300, which costs almost twice as much. That's the way it goes with digital cameras: new is almost always better, even for much less cost. The D90 has identical, or slightly better technical ...

The D750 is Nikon's third full-frame DSLR this year, and for a lot of our readers, it might be the most significant. Sitting between the more affordable D610 and the pro-grade, high-resolution D810, the D750 borrows elements from both cameras. Impressively though - with the exception of its 24 megapixel sensor - the D750's build quality, ergonomics and feature set have much more in common with ...

Nikon Lens Reviews. I've selected the lenses below based on my own personal experience during 10+ years shooting with Nikon cameras. I started with an APS-C sensor (DX) Nikon D40 which I purchased in Japan in 2007, then over the years upgraded to a D700, a D610, then finally a D750.

Reviews of older Nikon DSLR cameras no longer appear on my sites, as they are completely outdated, difficult to maintain, and I don't see much point in updating them as it's unlikely you'd really be interested in picking one up other than for historical interest (a couple of exceptions exist, noted below).

The Nikon D500 is a 21MP DSLR that shares most of its key features with Nikon's flagship D5, but packs them into a smaller APS-C format body. The long-awaited successor to the D300S, the D500 is Nikon's most professional DX-format camera ever and, with only a few exceptions, we've been very impressed. Read more
