Simple problems, on the other hand, have a well defined and stable problem statement; they have a limited solution space within which one can explore and find a definite final solution, and therefore, a stopping point when the solution is reached, and they have a solution that can be objectively assessed as right or wrong, good or bad.

On Wicked Problems and their Solution Strategies

Business analysis is a research discipline of identifying business needs and determining solutions to business problems. Solutions often include a software-systems development component, but may also consist of process improvement, organizational change or strategic planning and policy development.

Business analysis - Wikipedia

Multiple-criteria decision-making (MCDM) or multiple-criteria decision analysis (MCDA) is a sub-discipline of operations research that explicitly evaluates multiple conflicting criteria in decision making (both in daily life and in settings such as business, government and medicine). Conflicting criteria are typical in evaluating options: cost or price is usually one of the main criteria, and ...

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination of the optimal solution.

In 2013, GuideStar, BBB Wise Giving Alliance, and Charity Navigator wrote an open letter to the donors of America in a campaign to end the Overhead Myth—the false conception that financial ratios are the sole indicator of nonprofit performance. For our second letter, released in October 2014, we invite the nonprofits of America to do their part to focus donors' attention on what really ...
