It's funny. You'd think that with all the technology we've invented, there would no longer be a need for manual mode in photography. We've got cameras that can detect faces, cameras that can get rid of red eye, and cameras with a gazillion different shooting settings.

Manual Mode: A Primer :: Digital Photo Secrets

This week I did an informal survey on a few of my digital camera owning friends and asked them to nominate which shooting modes that they most commonly use on their digital cameras (they use a range of point and shoot and DSLR digicams). The results of this little survey didn't really surprise me - [...]

Manual-enabled modes. Manual-enabled modes give the photographer control over the various parameters of an exposure. There are three exposure parameters - aperture, time (shutter speed), and sensitivity (ISO), and in different modes these are each set automatically or manually; this gives $2^3 = 8$ possible modes. For a given exposure, this is an underdetermined system, as there are three inputs ...
